ALCOHOL GEL HAND SANITISER 823

In accordance with recognised industry practise and World Health Organisation guidelines, Sanitiser 823 contains in excess of 70% by volume of alcohol as recommended. Formulated in response to the focus on hygiene problems in areas where infection through cross contamination is a problem. This gel is used primarily for the sanitising of hands both prior to and after contact with patients, surfaces, instruments, food, etc. A blend of alcohol, skin emollients and thickeners designed to sanitise without the need for drying on a towel.

- Kills a wide range of micro-organisms, bacteria, fungi, viruses etc.
- No residual odour – unperfumed
- No wiping required
- Pleasant to use
- Leaves hands clean and germ free
- Contains emollients to prevent dryness of the skin
- Contains a denaturant to protect against accidental ingestion

Application

If possible wash the hands with a suitable soap and clean water prior applying Anti Bacterial Gel. Dispense 4/5ml of gel onto palm of the hand and then massage over front and back of both hands taking care to work well into webs & cuticle area. Ensure both hands are fully treated. Shake hands in air until dry.

DO NOT WIPE HANDS WITH TOWELS AFTER USE.
Repeat the process on a regular basis.

Available in a variety of packaging sizes.
